

# Dry Creek Landfill Medford, Oregon

Presented at 5<sup>th</sup> Annual LMOP Project Expo – December 14, 2001

The Dry Creek Landfill began operations in 1972 and is expected to close in 2048. The landfill is owned by Dry Creek Landfill, Inc., and operated by Rogue Waste.

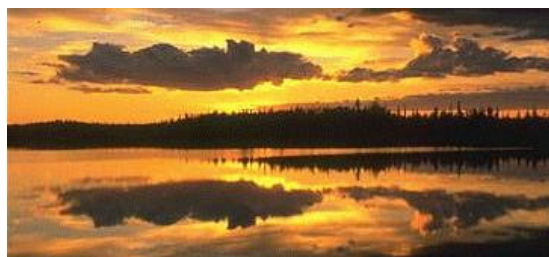

The landfill is located south of Highway 140, by Agate Lake on Dry Creek Rd. It consists of an older section that operated between 1972 and 1998, and an active section that will operate from 1998 to closure in 2048.

Approximately 250 cfm of LFG are collected from 20 vertical wells in the closed section, and flared. The landfill is in the process of installing 12 horizontal collectors in the active section. The site is not required by NSPS to destroy LFG.

Please contact Don Cordell if you'd like more information, or want to talk about the possibility of a project.

## Landfill Specifications

<b>Waste in Place</b>	1,650,000 tons
<b>Annual Tons</b>	350,000
<b>LF Area</b>	45 acres
<b>Avg. LF Depth</b>	50 feet
